Summary

AI/ML engineer leveraging deep learning, natural language processing, and advanced software engineering skills to deliver impactful solutions. Experienced in developing web applications and multi-agent systems, utilizing tools like TensorFlow, Python, and JavaScript to drive technology-driven results.

Experience

2019 - 2020

Graduate Developer

Drone That Pty Ltd
Brisbane, QLD

- Developed responsive web applications using HTML, CSS, React.js, Node.js, Express.js and JavaScript.
- Maintained website performance and optimized load times for users.
- Implemented SEO best practices to improve website visibility and search engine ranking.

2018 - 2018

Web Developer Intern

Logan City Council
Logan, QLD

- Developed property reporting system using JavaScript to streamline data visualization
- Contributed to GIS mapping and urban planning tools to enhance project analysis
- Participated in team meetings to discuss project requirements and timelines.

Projects

- An LLM-enhanced Agent-based Simulation Tool for Information Propagation (Yuxuan, 2024), Built LLM-powered agent simulation system for information diffusion. Developed interactive visualization platform; Keywords: Python, Transformers, Agent-Based Modelling; URL: <https://doi.org/10.24963/ijcai.2024/1007>
- Multi-Agent UAV Search & Rescue system, Developed reinforcement learning system for UAVs coordination. Multi-agent decision-making simulation; Keywords: Python, Deep Reinforcement Learning, ML, AI, Multi-Agent Systems
- Chicken Disease Detection System, CNN-based image classification model using TensorFlow. Built full ML pipeline from data to evaluation.
- Student Performance Prediction, Regression-based ML pipeline using XGBoost and Scikit-learn.

Education

07/2023

Master of Information Technology And Systems in Data Science

Hobart, TAS

University of Tasmania

GPA: 6.19/7

06/2018

Brisbane, QLD

Bachelor of Information Technology in Software Development

Griffith University

Certifications

- Google Cloud Professional Machine Learning Engineer
- Google Cloud Big Data and Machine Learning Fundamentals
- Microsoft Certified: Azure AI Engineer Associate
- IBM RAG and Agentic AI
- Australian Computer Society accredited Data Science Professionals

Skills

- Python/JavaScript/TypeScript
- FastAPI/Flask
- Node.js/React.js/Express.js
- SQL/NoSql
- TensorFlow/Pytorch
- Deep Learning
- Natural Language Processing
- Computer Vision
- Reinforcement Learning
- LLMs/RAG/Agentic AI
- LangChain/LangGraph
- Multi-Agent Systems
- AWS/GCP/Azure
- Docker/GitHub Actions/CI/CD
